

## **Data Recovery Man 714-361-2650**

### **Recovery Levels**

Data Recovery can be broken down into 3 distinct recovery levels.

Level 1 – Logical Repair / Level 2 – Drive Failure / Level 3 – Mechanical.  
During the evaluation phase we will determine the level of service needed. While some recovery companies will give you a huge range to recover your data we offer fixed recovery pricing based only on the level of service needed. We believe this is the more honest approach to recovering data.

**Data recovery, Done Right!™**

**The following represents typical examples to recovery levels. However the level of service required is always determined after a full evaluation of the media is performed by a Data Recovery Man technician.**

#### **LEVEL ONE – STANDARD Logical**

- Virus / Spy-ware Infections
- Blue Screen or Spin-Wheel
- Un-mountable Mac Volume
- Human Errors (Delete)
- Damaged MFT / FAT tables
- Unidentified Drive Type
- Minor Bad Blocks
- Un-repairable Mac Volume
- Other Logical Issues

**\$249.00**

#### **LEVEL TWO – ADVANCED Drive Failure**

- Exceeded SMART errors
- Unreadable Data Blocks
- Occasional Clicking
- Drive Timeouts
- Unstable Read Times
- Seek / Read Timeouts
- UNC Block errors
- Not Recognized in Bios
- LBA Errors

**\$599.00**

#### **LEVEL THREE – SEVERE Clean Room / Firmware**

- Clicking
- Head Crash (dropped)
- Moisture / fluid Damage
- Firmware (SA / ROM)
- No Power / Not Spinning
- Not Initializing
- Mechanically Failed
- Damaged Module
- PCB damage

**From \$999.00**
